TWENTY-FOURTH ANNUAL REPORT

OF THE

INSURANCE COMMISSIONER.

PART II.

LIFE, CASUALTY, AND ACCIDENT INSURANCE.

INTRODUCTORY.

To the Honorable the Senate and House of Representatives.

PART II. of the Twenty-Fourth Annual Report of this Department, presented herewith, exhibits in summarized and detailed form the condition and business of Life, Casualty, and Accident Insurance Companies authorized in Massachusetts, as returned for the last year. Though briefly epitomized, it is hoped that its *résumé* of data will be found sufficiently complete and suggestive for all necessary and practical use. Perhaps any seeming lack of detail may be properly chargeable to the legislative injunction of brevity in State Reports, as expressed in section 1 of chapter 264 of the Acts of 1878, and also to the very few days elapsed since the recent change in the Commissionership of this Department, dating only from May, 1879.

THE MASSACHUSETTS COMMISSIONERSHIP.

The unexpected resignation of Hon. STEPHEN H. RHODES as Insurance Commissioner, to accept the presidency of the John Hancock Mutual Life Insurance Company of Boston, was not, perhaps, so much a matter of surprise as of regret. His administration was the sixth, and the longest but two, since the establishment of the Massachusetts Department a quarter of a century ago; the two exceptions being those of Hon. Elizur Wright and of the present Commissioner, the latter the immediate predecessor and now successor of the

retiring officer. His long connection with the Department, nearly seven years as Deputy and as Commissioner, — more than four in the latter position, — gave Mr. Rhodes large practical experience, which, with his executive ability and unswerving faithfulness to every public trust, contributed much to the efficiency and success of his administration. In his retirement the State loses a faithful and valued official.

With his own six years of previous service as Insurance Commissioner, from 1869 to 1875, resigned because of then impaired health, the present incumbent returns again to congenial and familiar duties. With restored energies, and with departmental facilities admirably perfected and systematized by his predecessor, their discharge will be materially encouraged and strengthened.

LIFE COMPANIES AUTHORIZED IN MASSACHUSETTS.

These are the same as at the close of the preceding year, no new admissions or withdrawals having occurred. With the continued and extreme depression of business interests, it is a cause of satisfaction that the Companies represented in this volume have so well and so honorably maintained their financial status, and consequently their claim to public confidence. The statistical tabulations of their year's business, commencing on page xxiv, with the detailed statements which follow, closing with a list of their Massachusetts agents and an abstract of the business done by them, will be found a very full exhibit of their condition. This compilation of data and its preceding pages of review present experiences which, as a whole, are indicative of manifest improvement and progress.

ECONOMY AND REFORM. — FOUR YEARS AMONG POLICY-HOLDERS.

A few years of absence from the department service naturally prompts inquiry into the present condition and strength of Companies remaining in the Massachusetts field. Especially does the inquiry possess greater pertinence and force, because these years have been passed largely in personal and every-day communication with those whose hopes of future relief from want are vested in the security of life insurance. The very anxiety and distrust so extensively entertained,

too often with good cause, are pregnant with significant and instructive suggestions, withal so important and far-reaching as to justify this review. If further warrant were needed, it appears in the fact, that, even from 1874 to 1879, the insurance world has continued to experience great and adverse changes in the status and volume of its business,—results abundantly shown by the statistics introduced in these pages.

In the strife of competition reckless mismanagement and extravagance have wrought their legitimate and disastrous consequences. Very largely from these causes have come those great reverses, whose lessons should teach wisdom, prudence, and economy. In this connection it is a significant fact, that, during the decade ending with 1878, no less than forty-one Life Insurance Companies able to meet the requirements of the Massachusetts standard of solvency, and doing business within its limits, have disappeared therefrom,—ten of them since 1874. A very few of these Companies are still maintaining themselves on a lower standard of reserve in some of the States, and are apparently honest and now well-managed organizations; but much the larger number have become the unfortunate victims of an inevitable and foreshadowed mortality.

At the commencement of the decade which has witnessed so much demoralization and ruin in life insurance affairs, the Hon. John E. Sanford, then Insurance Commissioner of Massachusetts, gave utterance to this expressive and prophetic warning, —

“The rock on which so many Companies have been wrecked in England, and towards which some of our own are inevitably drifting, is extravagance. We set up the beacon of warning, and wait hopefully for the day when economy will be the shibboleth that bespeaks success, and surely wins the confidence of the public. Meantime, if we are asked to designate the Companies most likely to fulfil the trusts committed to them, we point, without a moment’s hesitation, to those above all others which still retain the most of this almost extinct virtue.” — *Fourteenth Report*, p. lvii.

How fully and how frequently this truthful and oft-cited declaration has been verified, it is needless now to repeat. Suffice that the experiences evolved from subsequent history have been, if possible, more unfortunate than were indicated by the prophetic anticipation. A startling proof of its fulfilment is revealed in these experiences, which show that for

many years the annual expenses of thirty-six of the retired Companies had averaged nearly fifty-three per cent, the range being from thirty-three to seventy-five per cent, the higher extreme being charitably credited to new business, while the average annual expenses of those able to remain in the field had been less than twenty-five per cent.

In periods of great business development and success, there seems notably a corresponding outgrowth of moral and financial irregularity, though, we venture to say, by no means so wide-spread and malevolent thus far, in life insurance transactions, as in some other departments of monetary interest. The remarkable magnitude so rapidly attained by life insurance in this country is shown by the fact that in fifteen years, from 1858 to 1873, its volume was augmented full twenty-fold, reaching more than two thousand millions of dollars, though since reduced by adverse auspices.

With the contemporaneous and extraordinary expansion of enterprise and production, precipitated in other directions by causes familiar in every business circle, the industries and resources of the country found everywhere unusual opportunities for profitable employment and pecuniary accumulation. Naturally enough, perhaps, the prudential restrictions and economies of previous usage and requirement were stimulated to opposite and almost startling extremes. That life insurance should have fallen more or less under the influence of this corrupting *régime* is neither more strange nor unaccountable, than that tares should spring up and choke the finest wheat; but the sifting process of these recent years has proved a powerful corrective, rapidly removing the untrustworthy and fraudulent, and leaving the business in more safe and honest custody.

The next and most important reform, already commendably effected by some Companies, is a proper reduction in the cost of management, corresponding in reasonable degree with the reduced prices of living, the depreciation of values, and the wide-spread depression of industrial and commercial interests, which the financial reaction of late years has inaugurated. In the face of such considerations it cannot be wondered that even a seeming approach to extravagant expenditure should provoke censorious criticism, especially among policy-holders whose money is thus absorbed, and who cannot be made to

see why it should cost two or three times as much to transact the business now as it did twenty years ago. That there has been in many cases material and equitable retrenchment is indeed creditable concession to a pressing demand. Any indifference in others is a matter in which Companies and their policy-holders have common interests.

Retrenchment is not always economy; neither are cheap officials and cheap services, in their ordinary sense, always desirable for the management of great and sacred trusts. Every depositor in a savings bank and every policy-holder in a Life Insurance Company knows, or ought to know, that his own best interests, as well as those of his dependents, are safer under the care and guardianship of a competent and experienced administration. While, therefore, the compensation of service should bear some equitable proportion to the responsibility imposed and the executive capacity required, it does not by any means follow that the great pay sometimes fortunately commanded in business and professional relations is economical, or fairly earned.

These remarks are ventured in no spirit of dictation, nor with any purpose of suggesting invidious comparison, or even reference. They are simply prompted by the belief that those who control the business of life insurance are able to silence the almost chronic clamor against real or supposed extravagance in that connection. It is certain that the managers of Companies reporting to this Department are too intelligent and discriminating not to foresee and appreciate the restoration of confidence and favor inevitably assured by a prudential administration in keeping with the changed conditions of business and finance. The statistical comparisons presented under the following caption exhibit great and encouraging results in that direction; but the subject is still one of vital interest and importance, and will remain so till every reasonable cause of complaint is removed. The demand for honest insurance will be heeded by every honest Company.

COST OF MANAGEMENT, WITH RATIOS, ETC.

Of the Companies represented in this Report, twenty-nine have been doing business continuously in Massachusetts during the last decade, twenty-four of them coming from other

REPORT OF THE

States. Among these are found the oldest Life Companies in the United States; but, whether older or younger, our purpose is fully accomplished in making one group of the whole.

As a fair basis for comparison, we summarize in various relations the business of these twenty-nine Companies at quinquennial periods, commencing and closing with the decade. The aggregated results, with their corresponding ratios, covering old and new business, are of interest as showing in every instance a steady reduction of working expenditure both in gross and in classified relations, and including and excluding dividends to stockholders. The following is the exhibit:—

Ratio of Salaries, &c., to Premium Receipts.

YEAR.	Salaries, Commissions, Pay, and Expenses of Officers and Agents.	Gross Premium Receipts.	Ratio.
1868	\$7,685,812	\$53,182,841	14.45
1873	7,329,385	69,028,653	10.62
1878	5,722,074	55,470,395	10.32

Ratio of Gross Expenses to Premium Receipts.

YEAR.	Gross Expenses, exclud- ing Dividends to Stockholders.	Gross Premium Receipts.	Ratio.
1868	\$10,011,674	\$53,182,841	18.82
1873	11,720,073	69,028,653	16.98
1878	9,275,977	55,470,395	16.72

Ratio of Gross Expenses to Gross Receipts.

YEAR.	Gross Expenses, includ- ing Dividends to Stockholders.	Gross Receipts from all Sources.	Ratio.
1868	\$10,138,235	\$60,954,876	16.63
1873	11,821,986	93,473,849	12.65
1878	9,430,299	78,194,789	12.06

Ratio of Expenses to Mean Amount Insured.

YEAR.	Gross Expenses, excluding Dividends to Stockholders.	Mean Amount Insured.	Ratio.
1868	\$10,011,674	\$1,123,972,749	.89
1873	11,720,073	1,598,277,046	.73
1878	9,275,977	1,475,288,852	.63

It will be quite apparent, of course, that if old and new business could be separately grouped with the proper ratios of expense strictly appertaining to each, these comparisons would disclose large, and in some cases enormous, differences not found in a combined aggregation. Similar results would measurably appear in a separation of the business of Companies having lower ratios of expenditure from that of Companies showing the higher. In such a classification of data, fairly returned, the ratio of salaries, commissions, etc., to premium receipts, which for 1878 shows an aggregate average of 10.32, would range by Companies from about 6.75 to nearly or quite 14; while, in a separation of new from old business, the ratio of expense applicable to the former would vary from 20 or 25 to 50 or even more,—the larger, however, applying now only in few cases.

In explanation of the higher ratios of 1868, it is but just to add, that, among the factors entering into their computation, a very much larger proportion of new business is included than in the tabulations for 1873 and 1878, the old business of the Companies bearing far greater preponderance in the latter years.

But, for all this, our tabulated statements herewith, showing for a decade large relative reductions in working expenditure, furnish gratifying evidence of retrenchment, which so many Companies have honestly and earnestly striven to accomplish. For reasons already explained, the largest reduction appears during the first quinquennial period; that alone in salaries, commissions, etc., aggregating upwards of twenty-six and a half per cent, and nearly nineteen and a half on the entire cost of management: while, for the whole decade, the aggregate reduction in the former connection has been up-

wards of twenty-eight and a half per cent, and in the latter nearly twenty-two per cent. This is a great and welcome result. For such an exhibit we congratulate every Company entitled to credit, and bespeak favorable consideration from every policy-holder.

RELATIVE RIGHTS OF COMPANIES AND POLICY-HOLDERS.

No Life Insurance Company can afford to assume the attitude of an autocracy; nor can any policy-holder afford to become a dictator. Both possess inherent and mutual rights in the business which brings them together,—rights which both are in honor bound to observe. Thus, in a very important and practical sense, life insurance may be said to become a *joint-partnership*, enormous in the magnitude of its trusts and obligations, and sacredly pledged to the just and honorable fulfilment of its beneficent purposes. Coöperation is therefore an essential prerequisite to success; we mean a coöperation uniting the insured and the insuring in an honest conservation of mutual rights and guaranties. Bad faith in this behalf is the harbinger of failure.

As already implied in these pages, the experience of an Insurance Department is largely interspersed with revelations of distrust, often emphasized with denunciation, on the part of dissatisfied and disappointed policy-holders, whose grievances, real or imaginary, are too frequently incited by their own unreasonable expectations and unwarranted demands. We venture the assertion,—indeed, we know,—that very much of the complaint and condemnation referred to emanates from those who have not even read, or only partially read, their policy contracts, and are of course sometimes strangely ignorant of the actual stipulations which bind the parties thereto. Besides, a large portion of this class fail to remember that an Insurance Company has legal and moral rights entitled to respect. It is notably true that from this source come many of the most persistent charges of deception and fraud,—evils which, whenever and wherever existing, are bad enough and humiliating enough without the exaggeration of mistaken or prejudiced inference.

That there does not exist in the public mind a strong and deep-seated belief and confidence in the intrinsic value and real necessity of honestly administered life insurance is not

for a moment admissible. That the people are not satisfied with present developments and conditions is equally certain. These facts seem conclusively proven by the increasing popularity of what are termed "prudential," "industrial," "mutual benefit," "mutual relief," "coöperative," and other plans of insurance, some of the latter having "no scientific basis or financial stability." They are also confirmed by the constant tendency of legislation for a better security of corporate pledges and acquired rights, and particularly by the growing demand for an equitable "surrender value," or proper equivalent for money invested, and for a wider recognition of some system akin, at least, to the non-forfeiture plan of Massachusetts.

These various, and in many respects widely conflicting, desires and opinions, originate in great measure from unwillingness to submit to what is so apt to be regarded as extortion and extravagance. And yet many Companies, with their present machinery and detail of operation, can scarcely transact business at cheaper rates or less expense. It would seem, however, that, with past experience and intelligent judgment, the managers of this business might adopt a mean standard of prudential administration, which would insure satisfactory and successful results.

On the other hand, it ought to be no surprise that many life insurance schemes inaugurated in the past as mere speculative projects in the interest of grasping stockholders should have been regarded as a fraud and a crime, especially when immense losses were entailed upon their dupes, and cherished hopes of future benefit swept away by ill-advised and dishonest management. It is thus the abuse of a great and noble beneficence has catered to the greed of a sordid and unprincipled charlatanry. But there are honest and well-managed Companies for all that, — Companies which scorn deception, honor truth, practise reform, and are jealous of their integrity. Such Companies are the protectors of policyholders, and of their widows and orphans. In their fruits they have honorable recognition. Between them and their patrons the comities of business courtesy and concession find welcome observance; and mere minor and technical points relating to contract obligations are mutually and equitably adjusted. Such a policy, carried out with earnest purpose, will accomplish wonders in the renewal of confidence and the revival of business.

ANNUAL STATEMENTS.

It is not intended by any comments under this caption to criticise or call in question the financial exhibit of any Company whose annual statement appears in the present Report. It is not believed that any such Company or its managers would for a moment sanction a misstatement, nor in any manner mislead those who place confidence in their integrity. It is simply desired to invite renewed attention to the necessary observance of commercial honor and duty, in the presentation of monetary intelligence and insurance data especially affecting the peace and prosperity of millions of trusting dependents.

The importance and value of a complete, intelligent, and truthful exhibit of finance in every department of business enterprise, cannot be over-estimated. For public information and scrutiny, common honesty and fair dealing demand nothing less. For the assurance and protection of confiding patrons, equity and duty imperatively require equal concession. No business man or firm or corporation, hoping for honorable position and successful result, can fail to realize the growing tendency of the times for honest information, for the teachings of practical experience, for improved methods of administration, and for the most perfect integrity and economy in financial management. All this is eminently right; for it looks directly to the removal of doubt and distrust, and to the restoration of confidence and faith in the solvent and secure.

A false presentation, whether in sworn statement, in specious advertisement, or in other cunningly devised and pretentious declaration, official or unofficial, will sooner or later recoil on its author or promulgator. In such practice disaster is the rule; and both the guilty and the innocent are sure to suffer, the latter too often in far greater ratio than the former. In the business of insurance, these results, both at home and abroad, in this century and in the last, have sometimes developed startling enormity. Whatever sins of omission or of commission may be charged to any supposed failure of government supervision and direction, it is certain that the scandals and frauds of the insurance world are more attributable to defective and ill-considered legislation, and to the facilities thus directly or indirectly afforded to plotting

speculators and unscrupulous rogues, whose heartless robbery of the widow and orphan confirm them as the blackest types of total depravity. That through technical construction and covert scheming great criminals so easily escape their deserts, does not particularly strengthen belief in the infallibility of human judgment and justice.

While deprecating unwise and adverse legislation, and desiring to relieve, as far as possible, all unnecessary burdens and embarrassments, it is hoped and believed that the Companies reporting to this Department will recognize and appreciate its wish to coöperate in all proper measures looking to the best interests of the insurer and the insured. In an intelligent, efficient, and equitable enforcement of such a *régime*, both Companies and their policy-holders are equally concerned. In the prosperity of the former are vested the hopes of the latter. Hence no well-managed and honorable Company need shrink from the light.

With the many systems of book-keeping in use, and the varied details appertaining to the business of different Companies, it is, perhaps, too much to expect perfect uniformity of statement, though great progress has been attained in that direction in recent years. There are still some deficiencies, among them the balance-sheet element, which is important as showing proper connection and disposal of financial resources. For the purpose of uniformity in our own Report, we have adjusted these balances in accordance with our own plan, but without injury to any Company. In a few instances the return of policy data, which forms a part of the statement, has been greatly delayed,—in one case till near the close of May. No exception should be taken, if promptness is hereafter required. With the observance of official duty and obligation so uniformly existing between Companies and the Department, and which we are gratified to acknowledge, there will be no interruption of mutual courtesy and aid in promoting the successful administration of insurance interests.

COMPARATIVE RATIOS.

The use of these factors in comparing and determining the conditions and relations of business and finance affords an accurate and trustworthy test, if equitably computed, affecting directly or indirectly present solvency and future per-

manency. Based upon a careful and critical investigation into the affairs of an insurance or other corporate organization, their exhibit possesses a value paramount to any general or ordinary showing.

In connection with life insurance, especially in its present aspect, both the Legislature and the public expect and demand critical and searching examination, in order to determine its actual condition and working. In response to this demand, we submit the tabulations cited in the following paragraphs, with such comments and explanations as seem pertinent to exhibits showing the consecutive history and tendency of the business for various terms of years. Their aggregation of results is not only creditable to the Companies represented, but should be gratifying and encouraging to their patrons.

TABLE A.—INCOME, EXPENDITURES, ASSETS, ETC.

In this Table are aggregated the monetary transactions of the several Companies for 1878. It will be observed that those represented hold nearly four hundred millions of admitted assets, against less than three hundred and fifty-five millions of liabilities. During the year they have added upwards of eight and a half millions to the former, against nearly six millions to the latter. In this result almost three millions have been added to their surplus; and their ratio of assets to liabilities has been advanced to 111.70 in 1878, against 111.10 in 1877; while twenty-nine of these Companies have advanced from 108.52 since 1873.

TABLE B.—RATIO OF NET ASSETS TO PREMIUM RESERVE.

This Table is not reproduced as a test of solvency, but only as a comparative exhibit of net assets or actual premium reserve, aggregating now nearly three hundred eighty-five and a half millions and computed premium reserve, or policy liability amounting to almost three hundred and forty-five millions. The ratio of the former to the latter is 111.81 against 111.10 in 1877, differing only in about the same relative proportion from that of gross assets to gross liabilities, the surplus varying in either only three-fourths of a million dollars in 1878.

The following compilation will be of interest, as showing in this connection the comparative aggregate status of twenty-nine of the Companies, whose business in Massachusetts has been continuous for ten years : —

Actual to Computed Premium Reserve.

YEAR.	Net Assets.	Computed Premium Reserve.	Ratio.
1868	\$139,558,188	\$117,831,769	117.89
1873	290,108,717	266,576,427	108.83
1878	385,298,457	344,751,700	111.81

These comparisons are not cited as a tribute to the mistaken theory that a large and increasing *surplus* of reserve is essential or even desirable for the safety or advantage of a Life Insurance Company, provided its statutory accumulation keeps pace under all circumstances with the growth of policy liability. True, a decreasing ratio of net assets to computed premium reserve may become a matter of serious importance when approaching or passing the line of impairment ; but this contingency is fully covered in other relations.

The compounding of a Company's premium reserve at such appreciable rate of interest as will always meet the actual assumptions on which premiums are calculated, is an element of primary and vital importance ; but the claim that a high ratio of assets to liabilities is in all cases evidence of superior strength and soundness is simply fallacious. There may be, and indeed there are, good reasons why young Companies should retain large percentages of reserve in order to provide for exceptional and other demands upon their resources incident to their earlier experience ; but it is not necessary that older and stronger Companies should hold great percentages of *surplus* merely for accumulation and prestige.

Some insurance theorists and even experts may deem the proposition radical and unsafe, yet we are bold to affirm that policy-holders are clearly entitled to have all excess of surplus beyond an ample reserve *margin* equitably apportioned among them, or to receive in some form their proper share of

benefit therefrom. From such reasonable concession no Company could suffer or become impaired under any emergency likely to occur, while policy-holders would secure manifest rights, and the business of insurance gain popularity and strength.

TABLE C.—RATIO OF PREMIUM NOTES, ETC.

The ratio of premium notes and loans, to computed premium reserve, as shown in this table for a series of years, indicates a continued approach by most of the Companies to a cash basis. This class of assets held by twenty-four of the Companies at the close of the year aggregated nearly twenty-seven millions, the ratio for 1878 being 7.82, which is a reduction of more than fifty per cent during the last five years. In view of existing financial embarrassments, an extension of the credit system might have been anticipated; but the opposite result is at least a favorable omen.

TABLE D.—RATIO OF INVESTMENTS TO GROSS ASSETS.

This Table is retained because of its classification of investments, and their ratio to gross assets. In both of these particulars, it is instructive and useful. It appears from the tabulation that premium notes, uncollected and deferred premiums, and interest accrued and unpaid have been materially reduced in amount. The same is true of loans on mortgages and collaterals, while the real estate, stocks, bonds, etc., owned by the Companies, have increased from 33.12 in 1877 to 38.35 in 1878. The general character of the assets now held by the Companies named in the Table is indicated by the fact that nearly three hundred and forty-two millions, or more than five-sixths, are invested in real estate, stocks, bonds, mortgages, and other first-class securities, at present market value.

TABLE E.—POLICIES ISSUED, TERMINATED, GAINED, ETC.

This is a summarized statement of the year's business, showing new, terminated, and outstanding risks with net gain or loss thereon. Only one Company, the Provident Life and Trust, shows a gain in amount insured, and that for less than \$300,000, while six report a gain in the number of policies issued, and all but one a loss in amount insured,

though the loss is materially less than in 1877. The net loss in number of policies is 18.133, and in amount of risk \$68,240,195, or four and a half per cent of the whole amount insured.

At the close of 1878 all the Companies doing business in Massachusetts were carrying \$1,444,339,557 of insurance against \$1,897,184,226 at the close of 1874; or, in another view, twenty-nine that were authorized in the State in 1874 were carrying \$141,222,122 in 1878 against \$1,630,119,432 in the former year.

The heavy decrease in the volume of new business during the last ten years is fairly shown in the experience of those last referred to, their risks written in 1868 amounting to \$345,777,689; in 1873, to \$339,653,649; and in 1878, to \$143,987,005.

TABLE F. — STATISTICS OF MORTALITY.

The claims by death in 1878, with ratios for five years, are shown in this tabulation. The number of claims during the year was 7,321, amounting to upwards of nineteen and a half millions in thirty-two Companies, ranging by Companies from \$6,000 to more than \$3,000,000. The ratio of death claims in 1878 to mean number of policies was 1.21, and to mean amount insured, 1.32 against 1.24 in 1877. The average ratio to mean amount insured for the five years from 1869 to 1873 inclusive was 1.09, and for the five years from 1874 to 1878 inclusive, 1.26.

These losses are by no means excessive in their average, nor apparently beyond the ratio of actuarial expectation, although in their detail some may or may not be so, that being a question largely contingent upon the age of policies at maturity, and upon careful and judicious selection. So vital, however, are the present and prospective interests involved in the mortality experience of every Company, that none can afford to disregard the underlying principle of insurance on human lives, which, harmonizing with natural laws scientifically determined and applied, keeps a Company's actual losses within the limits of its premium accumulation, and guarantees the fulfilment of its obligations, in spite of increasing mortality consequent on the advancing age of its members. Next to the best selection of risks, the accumulation of reserve should

keep pace with the natural increase of mortality. With honest management, and a proper observance of these essential conditions, safety will be assured, and no induction of impaired vitality will be permitted to jeopardize future hopes and prospects, either under the temptation of experiment or temporary success.

TABLE G.—RATIO OF EXPENSES TO MEAN AMOUNT INSURED.

In his first Report, published in 1875, the late Commissioner, Mr. Rhodes, who then introduced this form of exhibit, was right in saying, that, in consequence of a lack of uniformity in keeping income accounts, ratios of expense to income do not in all cases fairly represent the relative cost of management; but, assuming uniformity in the method of reporting outstanding insurance, this Table he believed to be the fairest presentation of comparative ratios of expense. Accepting this view, we note with pleasure a continued reduction in the average expense ratio. The mean amount of insurance carried in 1878 by the Companies named was \$1,478,457,257, and the expenses amounted to \$9,313,699; the ratio being .63, — a reduction of more than thirty-three per cent from 1869.

As an item of additional interest in this connection, it may be stated that the mean amount of new business written by such of these Companies (29), as were in Massachusetts at the beginning of the last decade, was \$328,704,237 in 1868 \$313,843,743 in 1873, and \$137,484,549 in 1878.

TABLE H.—MASSACHUSETTS BUSINESS.

The new business in this State shows a slight gain in the number of policies issued during the year, but a comparatively small decrease in the amount insured. The following statistics of Massachusetts business for five years ending with 1878 will be of interest at least to local readers:—

YEAR.	New Business. Amount Insured.	Old and New Business. Premiums collected.
1874	\$18,428,298	\$7,118,904
1875	18,260,266	6,676,969

CASUALTY AND ACCIDENT INSURANCE.

Sixteen different Companies, all but one chartered in other States, have at different times represented this branch of insurance in Massachusetts. Of these, only six now remain; one of them, the Travelers' of Hartford, standing as the pioneer of the business, which was introduced in this country in 1864. The Travelers', into which the Railway Passengers', also of Hartford, was merged during the last year, insures against accidents to person only, — a business entirely distinct from that of life insurance transacted by the same Company. Of the others, two, the Metropolitan of New York and the United States of Philadelphia, write only plate-glass insurance; two, the Hartford Steam-Boiler and the Mutual Boiler, — the latter a Massachusetts Company incorporated in 1877, — insure only steam-boiler risks; and the other, the Knickerbocker Casualty, of New York, transacts all three classes of insurance.

Under the provisions of chapter one hundred and thirty of the acts of the present year, Companies from other States and countries transacting more than one branch of insurance will in future be restricted to one only in this Commonwealth, exception being made in the case of those writing marine insurance in connection with fire, and accident insurance in connection with life. Such Companies hereafter applying for admission must elect which class they will choose. The only Company now affected by this legislation is the Knickerbocker Casualty, which has elected to continue only the business of accident insurance in Massachusetts after July 1, 1879.

Respectfully submitted.

JULIUS L. CLARKE,
Insurance Commissioner.

STATISTICAL TABULATIONS.

LIFE AND ACCIDENT
INSURANCE COMPANIES
OF OTHER STATES

AUTHORIZED TO DO BUSINESS IN MASSACHUSETTS, WITH THE AGENTS
ACTING FOR THE SAME, AND THE AMOUNT OF BUSINESS DONE
BY EACH AGENT, FOR THE YEAR ENDING OCTOBER
31, 1878, AS RETURNED TO THE TAX COMMIS-
SIONER, AND BY HIM COMPILED.

EVERY AGENT OR SUB-AGENT of any Insurance Company not incorporated in this Commonwealth is required by law to procure from the Insurance Commissioner a CERTIFICATE OF AUTHORITY for each Company for which he proposes to act. The Certificate specifies the name of the Agent or Sub-Agent, and also the name of the Company for which he is authorized to act. It expires, and must be renewed, on the first day of April in each year.

To guard against the impositions of fraudulent Companies and dishonest Agents, the Commissioner deems it his duty to advise that parties solicited to insure in any Company not chartered in this State should *decline to deal with any person not holding the Commissioner's Certificate of Authority.*

For list of Agents and Sub-Agents, see page 148.
